

Empower Your Business with Simplified and Secure Mobility Management

Small to medium-sized businesses (SMB) are moving away from traditional business processes and are seeking mobile solutions that are easy to use, mitigate security risks and minimize IT investments. AirWatch provides SMBs with a simplified, affordable and quick to setup mobility solution to enable employees with the tools, resources and content they need while maintaining the security you require.

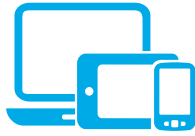

About AirWatch by VMware

AirWatch[®] by VMware[®] is the leader in secure mobility management, with more than 13,000 global customers. The AirWatch platform includes industry-leading mobile device, email, application, content and browser management solutions. Acquired by VMware in February 2014, AirWatch is based in Atlanta and can be found online at www.air-watch.com.

Key Solutions for SMB

Easy-to-Use Console

Maintain visibility across devices, apps, email and content in your mobile environment with AirWatch. Manage and secure devices for your business with our single, web-based management console.

Simplified Startup

Access useful startup guides that don't require complex downloads or technical skills. Easily find product documentation, administrator guides and how-to videos in the myAirWatch portal.

Highly Scalable Solution

Designed to support your organization now and in the future, our highly scalable, multitenant architecture can continue to evolve with your needs.

Bring Your Own Device Program Support

Protect employee privacy by separating corporate and personal data with AirWatch[®] Workspace. Support employee device choice without compromising the security and management of your mobile fleet.

Flexible Enrollment Options

Simplify device enrollment for end users with flexible enrollment options or enable administrators to enroll devices.

Automated Compliance Engine

Automatically alert end users and configure the compliance engine to detect non-compliance and take actions to correct.

Application Management

Distribute, secure and manage business apps with AirWatch[®] App Catalog. Prevent malicious apps from entering your mobile environment with app security policies.

Seamless Email Access

Secure access to corporate email while adhering to security policies. Maintain user experiences by supporting native email clients for Android, Apple and Windows devices or provide a containerized solution with AirWatch[®] Inbox.

Secure Content Collaboration

Enable employees with secure access to real-time information with AirWatch[®] Secure Content Locker[®]. Integrate directly to backend content repositories and secure collaboration with sharing, editing and annotation.

Telecom Management

Monitor telecom usage for employees using corporate devices with set compliance policies, alerts and roaming restrictions.

Self-service Portal

Reduce IT support requests and provide end users basic administration over devices in AirWatch self-service portal. Enable enrollment, perform remote commands, view detailed device information, request applications and technical support, and add content and collaborate in Secure Content Locker.
