

# Enable Mobile Learning to Enhance the Classroom Experience

Schools are using mobile devices as a means to engage students in new and compelling ways, both inside and outside of classrooms. New teaching practices such as flipped classrooms and blended learning that leverage the power of mobile devices and digital content empower teachers to create personalized learning pathways for each student, yet present challenges to classroom management and student safety. Students increasingly use mobile devices every day to access educational content, drive their own learning and collaborate with teachers, parents and other students, making device security and student safety paramount concerns.

AirWatch<sup>®</sup> by VMware<sup>®</sup> enables next generation mobile learning by empowering schools to deploy, manage and secure mobile devices for safe classroom use. Configure applications and content suited for each student across device types, operating systems and deployment models to enable secure mobile learning environments. With AirWatch, track mobile assets, configure security policies, automate compliance settings and secure access to school networks. Enable mobile learning to enhance student engagement and transform the classroom experience for both teachers and students with AirWatch.

## About AirWatch by VMware

AirWatch<sup>®</sup> by VMware<sup>®</sup> is the leader in enterprise mobility management with a platform including industry-leading mobile device, email, application, content and browser management solutions. Acquired by VMware in February 2014, AirWatch is based in Atlanta and can be found online at [www.air-watch.com](http://www.air-watch.com).

## How We Are Different

- Manage multiple device types and operating systems from one console
- Support BYOD, 1:1 and shared devices programs across school systems
- Leverage multitenancy to monitor devices across schools and districts
- Balance device management between IT administrators and educators
- Secure the distribution and usage of internal and public apps
- Manage Apple Device Enrollment and Volume Purchase Programs
- Lock students into classroom approved apps, content or websites
- Simplify classroom management with AirWatch<sup>®</sup> Teacher Tools<sup>™</sup>
- Distribute digital content with AirWatch<sup>®</sup> Secure Content Locker<sup>®</sup>
- Integrate with existing education system IT infrastructure
